Since 1990

CATALOGUE 2024

THE VIBRANT WORLD OF
**CORPORATE
GIFTING**

Excellence is our motivation; attention to detail & quality, our byword.

Genesis Promotional Gift Products is a company dealing with corporate gifts and has been serving customers since 1990 in Abu Dhabi & Dubai, U.A.E as well as in Sugarland, U.S.A and in Mumbai, India.

We are committed to providing the most cost-effective & result-oriented products to suit every single need of your company. Gifts are a honourable gesture & speak the language of gratitude, reward & remembrance. In business etiquette these days, they are an absolute necessity and we are proud to say that Genesis Promotional Gift Products is a 'Solution Provider' in the field of gift selection.

We take pride in being versatile and innovative, meeting the specific needs of a wide range of regional, national and international clients belonging to various institutions. To meet all your requirements, we have a professional, amicable and an effective team equipped with a detailed catalogue, an impressive website and an efficient backend system. We can assure you an extensive range of designs, a quality unparalleled & a price that is competitive & affordable.

Going an extra mile and to add to a touch of class, we also have in-house services of embroidery, etching, engraving, embossing/de-bossing, screen printing & UV printing for names or corporate logos. Regardless of the size of your purchase, each & every piece receives meticulous care & attention. We can ship to any local, regional or international location.

Apart from our expansive list of items displayed, our membership of the Advertising Specialties Institute (ASI), U.S.A and having a sourcing office in China enables us access to more than 250,000 additional products. Just let us know what you need and we will source it for you.

To help you make your best choice, Genesis Promotional Gift products awaits your call.

With best regards,

**ANSH NASTA
PARTNER**

BRANDING TECHNIQUES

Choosing the right product for your promotional program is essential to achieving your goals. It is equally important to select the right decorating method for your promotional merchandise. There are many factors to consider, from the material, shape and colour of the product to the design of your logo and the printable space allotted for the promotional message.

At Genesis, we take the time to discuss and recommend decorating methods to ensure that your logo and message will result in a memorable and lasting impression.

The explanations below are designed to introduce you to the decorating options for promotional merchandise. We hope you find this information helpful.

PAD PRINTING

Pad printing is a process where an inked image is transferred from a photo-etched plate to a thin, soft silicone pad. The pad is then pressed against the plastic part. The pad can wrap itself as much as 180° around a small object, and ink coverage is excellent. Though other methods of printing have progressed, Pad printing is used for printing on otherwise difficult to print on products in many industries including medical, automotive, promotional, apparel, and electronic objects, as well as appliances, sports equipment and toys.

Highlight – Can print on soft round surfaces

Shapes – Circle, Semi-circle and Irregular shapes

Material – Plastic, Glass, Ceramic & Metal

Colours – Maximum of 2 colors

Products – Mainly used for Stress balls, Golf balls & irregular shapes

Pricing – Based on Logo Size x No. of impressions

SCREEN PRINT/ SILK SCREEN

Screen print or Silk Screen is the direct imprinting of a one-color design or text onto the surface of a product. The image is pressed through tensioned nylon mesh, leaving a paint-like appearance. This generally results in a better imprint than a Pad Printing.

Highlight – Sharp, high-quality decoration on flat and curved surfaces

Shapes – Flat & Curved

Material – Metal, Plastic, Polyester, Nylon, Cotton and Non-Woven materials

Colours – Maximum of 6 colors for non-textiles and maximum of 4 colors for textiles

Products – Clocks, USBs, Powerbanks, Speakers, Sunshades, Mugs, Pens, etc.

Pricing – Based on Logo Size x No. of impressions

EMBROIDERY

Embroidery is decorating fabric or other materials with needle and thread or yarn

Highlight – Rich and lasting look

Shapes – Flat

Material – All kinds of woven and knitted textiles

Colour – Maximum of 12 colors

Products – T-shirts, Caps, Jackets, Bags, etc.

Pricing – Based on total number of stitches

SUBLIMATION/HEAT TRANSFER

Transferring is done by first creating a digital / screen print image on paper and then using heat to transfer it onto the chosen product.

Highlight – Allows for extreme detail like small text and multiple colours logo as well as a full image

Shapes – Flat

Material – Cotton, Polyester, Nylon, Ceramic, Metal and Wood

Colours – All CMYK Colours

Products – T-shirt, Caps, Bags, Jerseys, Ceramic Mugs, Wooden Plaques, etc.

Pricing – Based on Printing Size and Turnaround Time

LASER ENGRAVING

Laser engraving is a process that uses light to burn an image onto the substrate. The imprint color may vary depending on the material of the product. Laser Oxidation is available on items where the surface and the substrate are the same color. (The imprint turns black with Oxidation.)

Highlight – Gives the Logos a clean and polished look

Shapes – Flat and curved

Material – Metal, Plastic, Wood and Leather

Colours – Similar to the material with a little burnt shade/ Material inner shade

Products – Pens, USBs, Keychains, Clocks, Powerbanks, etc.

Pricing – Based on the Logo size or the laser machine time taken

DE-BOSSING/ EMBOSING

This is a process in which a metal die is created from artwork. The die is then heat-pressed into the material, leaving a depressed or raised image of the artwork

- Highlight – Adds perceived value by creating a unique 3D look
- Shapes – Flat
- Material – Leather, PU, Rexine/Rexene, Cardboard, Vinyl and Paper
- Colours – A darker shade of the material colour
- Products – Portfolios, Wallets, Organizers, Notebooks, etc.
- Pricing – Based on the Logo size and complications

HOT STAMPING/ FOILING

Hot stamping/Foiling is de-bossing with a metallic finish, created by applying foil between the to-be-decorated surface and the dye.

- Highlight – Adds perceived value by creating a unique metallic 3D look
- Shapes – Flat
- Material – Genuine and Artificial leather, Paper, PU, PVC and Cardboard
- Colours – Silver, Gold, Bronze and other basic metallic colours
- Products – Portfolios, Wallets, Organizers, Notebooks, etc.
- Pricing – Based on Printing Size and Turnaround Time

Doming/Epoxy

Doming is used to create a 3D version of your image by shaping a raised surface beneath the print. A mould is formed, printed and filled with epoxy which is then hardened to maintain its shape.

- Highlight – Full high quality image with a strong resistance to fading or damage
- Shapes – Flat
- Material – All kinds of materials
- Colours – All CMYK colours
- Products – Key chains, USBs, Clocks, Fridge Magnets, Name Badges, etc.
- Pricing – Based on Printing Size and Turnaround Time

UV PRINTING

UV printing is a form of digital printing that uses ultra-violet lights to dry or cure ink as it is printed. As the printer distributes ink on the surface of a material, specially designed UV lights follow close behind, curing - or drying - the ink instantly. Because the UV lights cure any printed ink immediately, the dots of wet ink do not get a chance to spread out once printed, resulting in much finer detail. This curing process is more environment friendly as it produces few VOC's, odor, and heat. UV curing also allows the flatbed printer to be used with non-traditional materials like acrylic or aluminum. In fact, this UV flatbed printer is compatible with most substrates up to 2" thick.

- Highlight – Perfect for multi colored logos
- Shapes – Flat, Curved
- Material – All kinds of materials
- Colours – All CMYK colours
- Products – USBs, Pens, Powerbanks, Notebooks, Bottles, Mugs, etc.
- Pricing – Based on Printing Size and Turnaround Time

OFFSET PRINTING

Offset printing is a commonly used printing technique where an inked image is transferred from a plate to a rubber blanket, then to paper. The offset process is a lithographic process. Lithography is a process based on the repulsion of oil and water.

- Highlight – Best technique for data printing which provides highest quality
- Shapes – Flat
- Material – Paper, cardboard and PVC sheets
- Colours – All CMYK colours
- Products – Brochures, Catalogue, Notebooks, Business cards, etc.
- Pricing – Based on Printing Size and Turnaround Time

With more than 30 years of experience in this industry, we take all the expertise into account to provide the best possible outcome for the prints and with our in-house facilities for the above methods of printing, we can control the quality and the turnaround time of the outcome strictly and provide an efficient service.

Our vast experience, combined with the following of industry best practices ensures a quality representation of every logo.

SYNC

9GE - 1
SYNC

Smart Pen & Notebook Set with Companion App!

The innovative Sync Set allows you to easily digitize your notes/doodles from the notebook into the companion app with multiple languages support. There are various customizable features that allow you to choose from the color, thickness, and pen/pencil from the bottom of the paper while digitizing the notes so you are not limited by a single style. The pen has a special motor sensor that allows simultaneous transmission on the paper and app through editable digital files. The app has a useful OCR feature built in so your handwritten notes can be transcribed into digital text as well. The set supports offline use as well, so if you don't have access to the internet momentarily your notes will be transcribed later once you are back online. The pen utilizes Bluetooth 5.0 for the quickest transmission and supports various export formats like PDF, JPG, DOC, etc. The app also allows you to easily search through your notes for specific text by various phrases or tags making it simpler to utilize your notes effectively.

Box Set Includes 1 Sync Pen & 3 Notebooks.

TOUCH SENSITIVE LCD DISPLAY TO CHECK WATER TEMPERATURE

19GE - 1 GETFIT SMART BOTTLE (APP EDITION)

Smart Bottle with Temperature Display & Companion App

Drinking enough water everyday is pivotal to our health and wellbeing and this smart bottle can get you on the right track with your water consumption. It comes in a premium matte black finish along with an LCD touch screen at the top for ease of access in setting up water drinking reminders. The ring around the touch screen lights up to either green, yellow or red to indicate the water temperature from cold to hot. It comes with a companion app through which you can connect the bottle to your phone via bluetooth. The app allows you to analyze your water drinking habits over long periods of time and also suggests the amount of water you should drink as per your body volume. It also shows you the percentage completion of your water drinking goal for the day which will keep you motivated and on track. Long battery life makes the bottle convenient to use and the insulated material helps you keep your drinks cold or hot for long periods of time.

20GE - 1* SCHWARZWALD E-LUNCH BOX

Thermally insulated portable Electric Lunch Box to keep your food warm

Tired of those cold and boring lunches? Hissled with waiting in the office queue to use the microwave? The E-Lunch Box is perfect for working professionals as it is a stylish and leakproof electric lunchbox that can be simply connected to a power supply to warm up your food so you can enjoy it more. Plug it in 30-45 mins in advance depending on the type of food so it can heat up sufficiently and open the release outlet so the steam dissipates before eating your food. Once heated the food remains at 70° celsius so you can enjoy it whenever you're ready to eat. The Lunch Box is easy to clean with removable parts and does not short circuit even when damp.

POWERSTAND**

Your Portable Charging Hub

Tired of holding your phone/tablet in your hands for hours for long meetings until your hands hurt? This 6,000mAh power bank with a stand can solve that problem! The convenient foldable element makes it easy to fit into any small backpack or pocket. In the era of video calls and online meetings, it serves as the perfect accessory for any working person. Carry the power bank anywhere and set it up on any flat surface, and voila! You have a working set up that can be carried anywhere for meetings, video conferences or also to catch a quick movie or TV series on the go! It can easily carry any phone or tablet up to 12.9 inches and it provides you with ample power to charge your phone or larger devices as well.

*Wireless chargers work with most of the latest Android and iOS devices. Mobile cases may affect the rate of charging. For smartphones that do not support wireless charging, adapters, (wireless receiver modules) are available at an additional cost.

ECO-FRIENDLY SMART ERASABLE NOTEBOOK**

Premium Schwarzwald A5 Notebook with Erasable Pen and Companion App

This eco-friendly set combines a premium Schwarzwald branded A5 Spiral notebook with an erasable pen. Simply write your notes in the book and scan and store them in the companion app provided. Once you have stored your notes in the app, you can simply erase the notes in the book using the eraser provided on the top of the pen cap. Other ways to erase notes are using a hairdryer for a few seconds on the desired area or using the cloth provided in the box and making it slightly damp to erase easily. The app can be used to scan, share, edit, manage and convert to different file formats. The 2 standout features include the innovative smart scan feature that can be used to easily scan a range of documents rapidly and the OCR feature can be used to detect and edit text easily.

171GE - 1 GETFIT SMART BOTTLE (STANDARD EDITION)

Smart Bottle with Temperature Display & Water Drinking Reminders

Drinking enough water everyday is pivotal to our health and well-being and this smart bottle can get you on the right track with your water consumption. It comes in a premium matte black/white finish along with an LCD touch screen at the top for ease of access in setting up water drinking reminders for 1, 1.5 or 2 hours. The ring around the touch screen lights up to either green, yellow or red to indicate the water temperature from cold to hot. The 30-day battery life makes the bottle convenient to use and the insulated material helps you keep your drinks cold or hot for long periods of time. There is also a water expiration alert once 8 hours pass to ensure you replace your water.

179GE - 2 SUPERSONIC JUICER

350ml Portable Juicer with long lasting battery life

SuperSonic is the perfect companion for any health conscious person. It is extremely portable and easily fits into any small bag or backpack. It also has a convenient strap so it can be easily carried by hand as well. It has a 2,000 mAh battery which allows you to blend up to 10 smoothies or juices before needing to charge the device again. The body is made of a mix of high quality ABS plastic and artificial glass fiber that makes it impact resistant and super easy to clean. It also includes a blue silicon grip which makes it easy to hold and adds to the aesthetics of the product. It has a leaf shaped high-grade alloy blade which rotates up to 20,000 RPM which makes it quick and easy to blend most fruits and vegetables.

Warning : The juicer works well with less fibrous fruits and vegetables. For more fibrous fruits and vegetables it may take longer and may require you to add more water to the mix.

SELF STIRRING MUG

Magnetic Removable Stirrer

180GE - 1 SELF STIRRING MUG

- The 380ml self stirring mug is made of stainless steel & ABS, and the silicon at the bottom makes the mug stable and easy to use.

350ML SUSTAINABLE NO FALL MUG

Disposing of Coffee Grounds in landfills is known to exacerbate the greenhouse effect, therefore by recycling used coffee grounds we can reduce the overall carbon footprint. This 350ml No Fall suction mug makes use of this concept as it is made of recycled coffee grounds. It also includes a convenient cover so you can release the beverage steam before drinking to avoid scalding.

- Double wall Suction Mug (BPA Free) made from recycled coffee grounds outer cover & 304 Stainless Steel Inside.
- Its capacity of 350mL is sufficient to enjoy all sorts of coffee, be it hot or cold.
- Spill-proof thanks to grip-pad suction technology.
- Durable, easy to carry and lightweight.
- One touch flip lid makes it easy to drink on the go.
- Fits in your hands and most of the cup holders conveniently.

NO FALL TUMBLER

**186GE - 3
ELEVATE**

A double wall stainless steel thermal mug. Available in Dark Blue & Light Blue.

**187GE - 1
WHEATSIP**

A cup of wheat straw is a great option for take-away drinks, since paper cups are not really paper cups, but contain a layer of plastic inside and are a composite material. Bioplastic, which is based on wheat straw, is strong, natural, biodegradable, withstands large temperature differences (-20 to +120 degrees, which allows the cup to be used in the microwave and in the freezer), environmentally friendly, non-toxic, hypoallergenic and does not contain gluten.

The cup complies with FDA standards, certified for contact with food!

The volume of the cup is 280 ml and this thermo glass is made of wheat straw that has double walls and has the ability to retain heat (30 - 60 minutes), in addition, the inner cup can be removed and used, that is, it turns out 2 in 1. The lid is tight and has a silicone gasket to prevent leakage.

**187GE - 2
GRIPHARVEST**

350ml reusable coffee cup with a trendy yet natural look. It is manufactured from wheat husk and BPA free polypropylene. It has a double wall, which is well suited for hot drinks and the flip top lid and silicone band gives it an elegant look and feel.

SCHWARZWALD UV POLO

Stay cool, stay dry, stay protected.

Whether you are trekking in the forests, journeying through the desert or out in the sun for activities, you need an attire that befits the adventure! Our UV protected polos with moisture management have Cotton inside and Polyester outside that give added comfort and stretch needed in a polo. Made from the finest raw materials- Super-combed Cotton and Micro-Polyester, our fabrics are tried and tested in every weather conditions. Created by our team of technical experts who have mastered the art of making apparel that know how to perform – whether in a forest or in a desert or on the road. Schwarzwald UV is leagues ahead of the existing apparel available in the market and takes SUN PROTECTION apparel to the next level!

- Performance Polos made from superior combination of Cotton and Micro Polyester
- Subtle contrast tipped collar/cuff/placket/Side slits for a Corporate look
- Double textured fabric has outer layer in Micro-Polyester that gives the luster and crispy look of an elegant polo and inner layer has the softness and comfort of cotton
- Moisture Management Property pulls the moisture (sweat) out of the skin and transports it to the outer layer. With evaporation, the temperature drops inside the micro-environment creating a significantly cooler feel on the inside while the outer layer remains as fresh as when first worn
- UV treatment blocks UVA and UVB rays protecting the skin from the harshness of the Sun.

LONG LASTING VIRUS PROTECTION AND FRESHNESS
A SUSTAINABLE SILVER-BASED TECHNOLOGY FROM N9WORLD

203GE - 1*

BEEHIVE POLO

The unique beehive fabric knit texture encompasses maximum nano particles for optimum performance!

The right-side dummy pocket not only adds to the style but leaves the usual space for branding your unique logo on the left chest, and never sags unlike most other polos with pocket!

Highly functional features:

Silver nano technology imparts antiviral property to the fabric. When virus comes in contact with the fabric surface, **Silaide™** neutralizes the viruses, thus interrupting chains of infection!

Silaide™: Anti viral test results under AATC 100-2012, Test method for micro-organism, MS2 bacteriophage - RNA virus showed excellent results up to 20 washes.

**204GE - 1
COOL POLO T-SHIRTS**

2 layer fabric PM & Cotton

A special technology, fabric which protects the skin from harmful UV rays. UV protection avoids sunburn and protects your skin for long period, which keeps you healthy and fresh. Sweat absorbent feature keeps the body dry and comfortable; it pulls the moisture away from the skin to the surface of the fabric.

The Key Feature of the fabric is that it is constructed in a way where the inside of the fabric worn next to the skin is predominantly cotton and the outside is polyester. This therefore combines the comfort of cotton with the hardwearing properties of polyester.

The salient features of this material include:

- Easy care
- Wickability
- Breathability
- Softness
- Shape Retention
- Quick Drying
- Total Comfort
- UV Protection

*Wireless chargers work with most of the latest Android and iOS devices. Mobile cases may affect the rate of charging. For smartphones that do not support wireless charging, adapters, (wireless receiver modules) are available at an additional cost.

**187GE - 1
WHEATSIP**

A cup of wheat straw is a great option for take-away drinks, since paper cups are not really paper cups, but contain a layer of plastic inside and are a composite material. Bioplastic, which is based on wheat straw, is strong, natural, biodegradable, withstands large temperature differences (-20 to +120 degrees, which allows the cup to be used in the microwave and in the freezer), environmentally friendly, non-toxic, hypoallergenic and does not contain gluten.

The cup complies with FDA standards, certified for contact with food!

The volume of the cup is 280 ml and this thermo glass is made of wheat straw that has double walls and has the ability to retain heat (30 - 60 minutes), in addition, the inner cup can be removed and used, that is, it turns out 2 in 1. The lid is tight and has a silicone gasket to prevent leakage.

**187GE - 2
GRIPHARVEST**

350ml reusable coffee cup with a trendy yet natural look. It is manufactured from wheat husk and BPA free polypropylene. It has a double wall, which is well suited for hot drinks and the flip top lid and silicone band gives it an elegant look and feel.

COFFEE GROUNDS PRODUCTS

Why coffee grounds is the perfect sustainable material for gifts?

- Over 2.25 billion coffee cups are consumed around the world daily which amounts to about 2.5 cups a person daily, which leads to large amounts of coffee grounds ending up in landfills.
- This leads to the emission of various greenhouse gases like methane, which has a devastating impact on our environment.
- Why not make use of this waste product instead? The grounds can instead be diverted from landfills to new industrial applications like the production of corporate gifts
